Latar Belakang : Penularan scabies dapat terjadi melalui kontak kulit dan penggunaan barang pribadi bersama-sama. Tingginya kejadian scabies di pesantren dikaitkan dengan rendahnya kesadaran santri untuk mempelajari scabies. Tujuan penelitian ini adalah untuk mengetahui pengaruh edukasi dengan media poster terhadap pengetahuan dan sikap tentang penanganan scabies.

Metode : Penelitian ini menggunakan *Pre Eksperiment dengan metode one group pretest-posttest design*. Sampel adalah sebagian santri putra di Pondok Pesantren Al Khoziny Sidoarjo, sebanyak 89 santri dipilih dengan *purposive sampling*. Variabel independen edukasi media poster tentang penanganan scabies dan variabel dependen pengetahuan dan sikap. Instrumennya adalah kuesioner. Analisis data menggunakan uji *wilcoxon* ($\alpha = 0,05$)

Hasil : Pengetahuan penanganan scabies santri kategori baik meningkat dari 58,4% menjadi 73%, sikap santri juga menunjukkan pengetahuan kategori sangat baik dari 65,2% menjadi 96,6%. Pengetahuan dan sikap santri dipengaruhi edukasi media poster (p value 0,00; p value 0,00).

Kesimpulan : Edukasi media poster berpengaruh terhadap pengetahuan dan sikap tentang penanganan scabies pada santri putra, namun risiko penularan scabies masih tergolong tinggi. Diharapkan para santri menerapkan pengetahuan dan sikap terkait penanganan scabies di Pondok Pesantren Al Khoziny Sidoarjo

Kata Kunci : Edukasi, Media Poster, Pengetahuan dan Sikap, Penanganan Scabies.

ABSTRACT

THE EFFECT OF POSTER MEDIA EDUCATION ON KNOWLEDGE AND ATTITUDES REGARDING SCABIES MANAGEMENT AMONG MALE STUDENTS AT AL KHOZINY ISLAMIC BOARDING SCHOOL SIDOARJO

Muhammad Firhamsah¹, Sri Utami², Lembunai Tat Alberta³
Kpodhirzh@gmail.com

Background : Transmission of scabies can occur through skin contact and the use of personal items together. The high incidence of scabies in Islamic boarding schools is associated with the low awareness of students to study scabies. The purpose of this study is to determine the influence of education with poster media on knowledge and attitudes about handling scabies.

Method : This study uses Pre-Experimental with the one group pretest-posttest design. The sample was some male students at the Al Khoziny Sidoarjo Islamic Boarding School, as many as 89 students were selected with purposive sampling. Independent Variables of Poster Media Education about Handling Scabies and Dependent Variables of Knowledge and Attitudes. The instrument is a questionnaire. Data analysis using the wilcoxon test ($\alpha = 0.05$).

Results : The knowledge of handling scabies in the good category of students increased from 58.4% to 73%, the attitude of the students also showed knowledge in the very good category from 65.2% to 96.6%. The knowledge and attitude of the students were influenced by the education of the poster media (p value 0.00; p value 0.00).

Conclusion : Poster media education has an effect on knowledge and attitudes about handling scabies in male students, but the risk of scabies transmission is still relatively high. It is hoped that the students will apply knowledge and attitudes related to handling scabies at the Al Khoziny Sidoarjo Islamic Boarding School.
