ANALISIS PENGELOLAAN LINEN DI INSTALASI *LAUNDRY* RSUD dr. H. SLAMET MARTODIRDJO KABUPATEN PAMEKASAN TAHUN 2025

xv + 83 Halaman + 13 Tabel + 19 Lampiran

Pengelolaan linen di Instalasi *Laundry* RSUD dr. H. Slamet Martodirdjo belum dilaksanakan dengan baik meliputi perhitungan kebutuhan linen di ruangan, proses pengelolaan linen, dan petugas *laundry* yang merangkap pekerjaan. Penelitian bertujuan untuk menganalisis pengelolaan linen di Instalasi *Laundry* RSUD dr. H. Slamet Martodirdjo Kabupaten Pamekasan.

Penelitian ini menggunakan desain penelitian kualitatif dengan metode deskriptif. Subjek penelitian yaitu petugas *laundry* sejumlah 8 orang. Objek penelitian meliputi ketersediaan linen dan kondisi linen bersih secara fisik dan mikrobiologi. Teknik pengambilan sampel secara probability sampling dengan metode *random sampling*. Analisis data secara deskriptif kualitatif.

Hasil penelitian menunjukkan ketersediaan linen RSUD dr. H. Slamet Martodirdjo ada yang memenuhi syarat ≥ 3 par stok (ruang rawat intensif, rawat inap zal C, isolasi, poli saraf, dan poli kandungan) dan tidak memenuhi syarat < 3 par stok (ruang rawat inap paviliun, kamar bersalin, zal D, zal A, zal B, dan hemodialisa). Proses pengelolaan linen dengan kriteria baik (66%). Capaian kinerja petugas *laundry* sesuai Standar Prosedur Operasional pengelolaan linen dengan kriteria baik (87%). Kualitas linen bersih memenuhi syarat secara fisik (100%) dan mikrobiologi < 20 CFU/100 cm².

Kesimpulan penelitian yaitu ketersediaan linen RSUD dr. H. Slamet Martodirdjo belum merata. Proses pengelolaan linen dan capaian kinerja petugas *laundry* sudah baik. Kualitas linen bersih pada semua sampel penelitian secara fisik dan mikrobiologi memenuhi syarat. Kepala instalasi *laundry* perlu melakukan evaluasi kebutuhan linen secara berkala dan menyediakan kantong plastik linen kotor dan bersih, kereta pengangkutan yang tertutup, dan obat anti ngengat. Kepala instalasi *laundry* memastikan petugas bekerja secara efektif dan efisien.

Kata kunci : Pengelolaan Linen, Instalasi *Laundry*, Rumah Sakit, Kualitas Linen

ANALYSIS OF MANAGEMENT AT THE LAUNDRY INSTALLATION OF dr. H. SLAMET MARTODIRDJO, PAMEKASAN REGENCY IN 2025

xv+ 83 Pages + 13 Tables + 19 Appendices

The management of linen at the Laundry Installation of RSUD Dr. H. Slamet Martodirdjo had not been carried out properly, including the calculation of linen needs in each room, the linen management process, and laundry staff who held multiple responsibilities. This study aimed to analyze the linen management at the Laundry Installation of RSUD Dr. H. Slamet Martodirdjo, Pamekasan Regency.

This study used a qualitative research design with a descriptive method. The research subjects were eight laundry staff. The research objects included linen availability and the physical and microbiological condition of clean linen. The sampling technique used was probability sampling with the random sampling method. Data were analyzed using descriptive qualitative analysis.

The results of the study showed that the availability of linen at RSUD dr. H. Slamet Martodirdjo met the requirement of ≥ 3 par stock in some units (intensive care unit, inpatient ward Zal C, isolation ward, neurology polyclinic, and obstetrics polyclinic) and did not meet the requirement of < 3 par stock in others (pavilion inpatient ward, delivery room, Zal D, Zal A, Zal B, and hemodialysis unit). The linen management process met the criteria for good performance (66%). The performance achievement of laundry staff complied with the Standard Operating Procedures for linen management with a good performance rate (87%). The quality of clean linen met the requirements physically (100%) and microbiologically (< 20 CFU/100 cm²).

The conclusion of the study was that the availability of linen at RSUD Dr. H. Slamet Martodirdjo was not evenly distributed. The linen management process and the performance of the laundry staff were considered good. The quality of clean linen in all research samples met the standards both physically and microbiologically. The head of the laundry unit will need to regularly evaluate the linen needs and provide plastic bags for dirty and clean linen, covered transport carts, and moth repellent. The head of the laundry unit will ensure that the staff work effectively and efficiently.

Keywords : Linen Management, Laundry Installation, Hospital, Linen Quality.
