GAMBARAN SANITASI PASAR MANGGE, KECAMATAN BARAT,
KABUPATEN MAGETAN

Xv Halaman Permulaan + 79 halaman isi + 22 tabel + 3 gambar + 9 Lampiran

Pasar tradisional merupakan pusat aktivitas ekonomi masyarakat yang memiliki peranan penting dalam distribusi barang dan jasa. Keberadaan pasar tradisional sering kali dihadapkan pada permasalahan sanitasi yang dapat berdampak pada kesehatan masyarakat. Sanitasi di pasar tradisional merupakan aspek krusial yang mempengaruhi kesehatan masyarakat dan kualitas lingkungan. Pasar Mangge terletak di Kecamatan Barat, Kabupaten Magetan.

Jenis penelitian ini adalah deskriptif observasional yang bertujuan menggambarkan lokasi, bangunan, sanitasi, manajemen sanitasi, perilaku hidup bersih dan sehat, keamanan, dan sarana penunjang. Data dikumpulkan melalui observasi langsung, wawancara, pengambilan sampel, pengukuran, serta dokumentasi. Hasil penelitian disajikan dalam bentuk tabel dan dianalisis secara deskriptif.

Hasil penelitian menunjukkan bahwa aspek lokasi (100%), perilaku hidup bersih dan sehat (79%), keamanan (75%) memenuhi syarat. Aspek bangunan pasar (55%), sanitasi (49%), manajemen sanitasi (50%), dan sarana penunjang (50%) dinyatakan tidak memenuhi syarat. Pasar Mangge belum dapat dikategorikan sebagai pasar sehat dengan hasil (58%). Perlu adanya peningkatan fasilitas sanitasi dan pengelolaan lingkungan pasar secara menyeluruh. Keterlibatan aktif pengelola, pedagang, dan pemerintah daerah mendukung upaya pembenahan khususnya pada variabel bangunan pasar, sanitasi, manajemen sanitasi, dan sarana penunjang.

Kata Kunci: sanitasi pasar, pasar tradisional, pasar sehat, kesehatan lingkungan

GAMBARAN SANITASI PASAR MANGGE, KECAMATAN BARAT,
KABUPATEN MAGETAN

Xiv preliminary pages + 79 content pages + 22 tables + 3 figures + 9 appendices

Traditional markets are centers of economic activity and play a vital role in the distribution of goods and services. Traditional markets often face sanitation issues that can impact public health. Sanitation in traditional markets is a crucial aspect affecting public health and environmental quality. Mangge Market is located in the Barat District, Magetan Regency.

This research is descriptive observational, aiming to describe the location, buildings, sanitation, sanitation management, clean and healthy living behaviors, security, and supporting facilities. Data were collected through direct observation, interviews, sampling, measurements, and documentation. The results are presented in tables and analyzed descriptively.

The results of the study showed that the location (100%), clean and healthy living behavior (79%), and security (75%) aspects met the requirements. Market building aspects (55%), sanitation (49%), sanitation management (50%), and supporting facilities (50%) were declared unsuitable. Mangge Market cannot be categorized as a healthy market with results (58%). Improvement of sanitation facilities and comprehensive market environmental management is needed. The active involvement of managers, traders, and local government supports improvement efforts, especially in the variables of market building, sanitation, sanitation management, and supporting facilities.

Keywords: market sanitation, traditional market, healthy market, environmental health
