KEBERHASILAN PELAKSANAAN PROGRAM PIK R/M (PUSAT INFORMASI DAN KONSELING REMAJA/MAHASISWA) DI KELURAHAN SELOSARI KECAMATAN MAGGETAN TAHUN 2025

xvi + 16 Halaman + 10 Tabel + 7 Lampiran

Salah satu strategi yang diimplementasikan melalui PIK Remaja/Mahasiswa (PIK R/M) adalah menumbuhkan pemahaman dan sikap yang konstruktif pada generasi muda kalangan remaja terhadap isu-isu kesehatan reproduksi serta perencanaan keluarga. Penelitian ini dilakukan untuk menilai sejauh mana efektivitas pelaksanaan Program PIK R/M di wilayah Kelurahan Selosari, Kecamatan Magetan.

Pendekatan yang digunakan dalam penelitian ini adalah deskriptif kuantitatif, di mana data dikumpulkan melalui proses wawancara kepada Lurah Selosari dan pengelola PIK R/M menggunakan panduan resmi dari BKKBN. Data yang diperoleh dianalisis dengan metode persentase, kemudian disajikan dalam bentuk visual berupa diagram batang.

Hasil penelitian menunjukkan bahwa pelaksanaan program PIK R/M Shawo di Kelurahan Selosari Kegiatan ini secara keseluruhan berjalan efektif, ditandai dengan rata-rata capaian yang memuaskan sekitar 95%. Beberapa indikator utama, seperti pembentukan PIK R/M, kegiatan advokasi, sosialisasi, pemberdayaan sumber daya manusia, serta layanan konsultasi dan fasilitasi, menunjukkan hasil optimal. Meski Walau hasilnya cukup baik, terdapat beberapa hal yang masih membutuhkan perbaikan dan pengembangan, terutama Dalam aspek penguatan prasarana dan sarana pendukung, serta ketersediaan tenaga edukatif serta konselor sebaya, yang baru mencapai 76%. Selain itu, aspek pencatatan dan pelaporan mencapai angka 86%, namun masih belum sepenuhnya sesuai dengan standar yang ditetapkan.

Dari temuan yang diperoleh, dapat disimpulkan bahwa meski pelaksanaan program tergolong efektif, masih dibutuhkan upaya perbaikan di sejumlah bidang untuk memastikan keberlanjutan dan peningkatan kualitas layanan PIK R/M. Oleh karena itu, disarankan agar pengelola program, institusi pendidikan, fasilitas kesehatan, serta para peneliti memperkuat kolaborasi, meningkatkan sarana pendukung, serta mengembangkan pendekatan edukasi berbasis teknologi yang lebih inovatif untuk menjangkau remaja secara lebih efektif.

THE SUCCESS OF THE IMPLEMENTATION OF THE PIK R/M PROGRAM (YOUTH/ STUDENT INFORMATION AND COUNSELING CENTER) IN SELOSARI VILLAGE, MAGGETAN DISTRICT IN 2025

Xvi + 16 Pages + 10 Tables + 7

One of the strategies implemented through the Youth/Student Information Center (PIK R/M) is to foster a constructive understanding and attitude among young people regarding reproductive health issues and family planning. This research was conducted to assess the effectiveness of the PIK R/M program in the Selosari sub-district, Magetan District.

The approach used in this study is a quantitative descriptive method, where data were collected through interviews with the head of Selosari and the managers of 66 PIK R/M using an official guide from BKKBN. The data obtained were analyzed using 12 percentage methods and then presented visually in the form of bar charts.

The research results show that the implementation of the PIK R/M Shawo program in Selosari Village has generally run effectively, marked by an average achievement of around 95%. Several key indicators, such as the formation of PIK R/M, advocacy activities, socialization, human resource empowerment, and consultation and facilitation services, show optimal results. Although the results are quite good, there are still several aspects that need improvement and development, particularly in strengthening infrastructure and supporting facilities, as well as the availability of educational personnel and peer counselors, which have only reached 76%. In addition, the aspects of recording and reporting reached a figure of 86%, although it still does not fully meet the established standards.

From the findings obtained, it can be concluded that although the implementation of the program is considered effective, improvements are still needed in several areas to ensure the sustainability and quality enhancement of PIK R/M services. Therefore, it is recommended that program managers, educational institutions, health facilities, and researchers strengthen collaboration, enhance supporting facilities, and develop more innovative technology-based educational approaches to effectively reach adolescents.
