

ABSTRAK

PERAN ORANG TUA DENGAN KESIAPAN *TOILET TRAINING* PADA ANAK USIA *TODDLER* DI PAUD BUAH HATI KELURAHAN DOROMUKTI KECAMATAN TUBAN

Oleh : Selvia Rohmah Dela

Peran orang tua sangat penting dalam kemandirian anak dimana tahap ini berada pada tahap anal sehingga *toilet training* sangat dibutuhkan pada anak usia *toddler*. Namun, pada kenyatannya masih banyak anak di atas usia *toddler* yang belum siap dalam melakukan *toilet training*. Penelitian ini bertujuan untuk mengetahui hubungan antara peran orang tua dengan kesiapan *toilet training* pada anak usia *toddler* di PAUD Buah Hati kelurahan Doromukti kecamatan Tuban.

Desain yang digunakan dalam penelitian ini analitik melalui metode *cross sectional*. Populasi adalah Seluruh Orang tua Murid usia 3 - 4 tahun di PAUD Buah Hati kecamatan Doromukti Kecamatan Tuban sebanyak 40 orang tua. Sampel sebanyak 36 orang tua dengan teknik *simple random sampling*. Cara pengambilan data menggunakan kuesioner yang kemudian diolah dengan presentase, kemudian ditabulasi silang. Data yang diperoleh dianalisa dengan menggunakan SPSS 16.

Hasil penelitian menunjukkan hampir seluruh orang tua dengan peran maksimal memiliki anak yang siap melakukan *toilet training*. Dari hasil uji *Chi-Square* antara peran orang tua dengan kesiapan *toilet training* pada anak usia *toddler* didapatkan nilai signifikan sebesar $p=0,008$ ($p < 0,05$). Hal ini menunjukkan bahwa H_0 ditolak dan H_1 diterima yang berarti ada hubungan antara peran orang tua dengan kesiapan *toilet training* pada anak usia *toddler* di PAUD Buah Hati kelurahan Doromukti kecamatan Tuban.

Peran maksimal orang tua dapat menunjang kesiapan anak dalam melakukan *toilet training*, dengan memahami kesiapan anak dalam pembelajaran *toilet training* sehingga dapat memberikan peran maksimal dalam melatih *toilet training*.

Kata kunci : Peran orang tua, Kesiapan *toilet training*, Anak usia *toddler*

ABSTRACT

ROLE OF PARENTS WITH READINESS TOILET TRAINING ON TODDLER AGES AT PAUD BUAH HATI IN DOROMUKTI VILLAGE TUBAN SUB DISTRICT

By: Selvia Rohmah Dela

The role of parents is very important for children's independence where this stage is in the anal stage, so toilet training is needed on toddler. However, in fact there are still many children above toddler age who are not ready to do toilet training. This study aims to determine the correlation between the role of parents and toilet training readiness on toddler-aged children in PAUD Buah Hati in Doromukti vilaget, Tuban sub-district.

The design used in this study was analytic through cross sectional method. the population was All student's parents aged 3 - 4 years in PAUD Buah Hati, in Doromukti Subdistrict, Tuban District, as many as 40 parents. Sample of 36 parents with simple random sampling technique. Data was collected by using a questionnaire which was then processed with a percentage, then cross-tabulated. The data obtained were analyzed using SPSS 16.

The results showed that almost all parents with the maximum role had children who were ready to do toilet training. From the results of the Chi-Square test showed that between the role of parents and toilet training readiness for toddlers, was obtained ` significant value of $p=0.008$ ($p < 0.05$). This showed that H_0 was rejected and H_1 was accepted which meant there was a correlation between the role of parents and toilet training readiness on toddler in PAUD Buah Hati in Doromukti sub-district, Tuban district.

The maximum role of parents can support the readiness of children to do toilet training, by understanding the readiness of children in toilet training so that it can provide the maximum role in training toilet training.

Keywords: The role of parents, toilet training readiness, toddler
