**STUDY OF APPLICATION FOOD PROCESSING HYGIENE AND
SANITATION IN MIFTAHU NURUL HUDA ISLAMIC BOARDING
SCHOOL JOSO TURI PANEKAN MAGETAN IN 2021**

ix + 70 Pages + 14 Table + 3 Picture + 11 Attachment

ABSTRACT

application of hygiene and sanitation of processing food at boarding school is important to note the action in order to avoid food poisoning or illnesses caused by makanan. Tujuan this study was to investigate the application of hygiene and sanitation in processing food by Permenkes 1096 / Menkes /PER/VI/2011.

This research is a study descriptive, with collection data using observation sheets, documentation, examinations laboratory. The research was conducted at the Miftahu Nurul Huda Joso Turi Panekan Islamic Boarding School, Magetan. The results of the study were analyzed using table analysis and described descriptively.

The results of the observations show that the food processing place is included in the category of not meeting the requirements with a percentage (62.5%). Food processing equipment is included in the category that meets the requirements with a percentage (90%). Food handlers fall into the category of not meeting the requirements with a percentage (75%). Food processing methods are categorized as eligible with a percentage (80%). The results of examination organoleptic on the samples studied showed that the results met the requirements, for the results of the physical examination showed that the food samples did not contain formalin. For the results of microbiological tests on food samples, the results meet the requirements with a quality standard of 10,000 col/gram. The results of the application of sanitation hygiene in food processing get the category of qualifying with a presentation (75.6%)

Based on the results of the study, it can be concluded that the application of sanitation hygiene Food processing at the Miftahu Nurul Huda Islamic Boarding School has been carried out well as a whole and meets the requirements. Suggestions from this study need further research related to the principles of hygiene sanitation and microbiological quality testing on equipment food used
