PRILAKU IBU RUMAH TANGGA DALAM PENANGANAN SAMPAH DOMESTIK DI DESA PANDEAN KECAMATAN DONGKO

ix + 56 halaman + 6 Tabel + 2 Lampiran

Banyak ibu rumah tangga yang membuang sampahnya masih di sembarang tempat, yang akan menyebabkan pencemaran terhadap lingkungan, mengganggu kenyamanan dikarenakan bau yang ditimbulkan. Dengan tujuan untuk mengetahui prilaku ibu rumah tangga dalam penanganan sampah domestik di Desa Pandean Kecamatan Dongko Kabupaten Trenggalek.

Metode penelitian yang saya lakukan adalah diskriptif yaitu penelitian yang dilaksanakan dengan tujuan untuk membuat gambaran atau deskripsi tentang suatu keadaan secara objektif tentang pengetahuan, sikap serta tindakan masyarakat di Desa Pandean dalam penanganan sampah domestik.

Tingkat pengetahuan responden tentang penanganan sampah domestik dengan kriteria baik sebanyak 60,4%, sikap responden dengan kriteria baik sebanyak 54,2%, dan tindakan responden dengan kriteria baik sebanyak 46,9 %.

Dari hasil analisa yang kami lakukan bahwa tingkat pengetahuan, sikap dan tindakan responden tentang penanganan sampah domestik di Desa Pandean adalah baik. Selanjutnya saya menyarankan supaya responden pada khususnya dan masyarakat Desa Pandean pada umumnya dapat meningkatkan pengetahuan, sikap serta tindakan dalam penanganan sampah domestik.

Kata kunci : prilaku, ibu rumah tangga, sampah domestik

BEHAVIOR OF HOUSEHOLD MOTHER IN HANDLING OF DOMESTIC WASTE IN PANDEAN VILLAGE, KECAMATAN DONGKO

ix + 56 Pages + 6 Tabels + 4 Attachments

Many housewives who dispose of their trash are still in any place, which will cause pollution to the environment, disturbing comfort due to the smell caused. With the aim of knowing the behavior of housewives in handling domestic waste in Pandean Village, Dongko District, Trenggalek Regency.

The research method that I did was descriptive, that is research carried out with the aim to make an overview or description of an objective situation about the knowledge, attitudes and actions of the community in Pandean Village in handling domestic waste.

The level of respondents' knowledge about handling domestic waste with good criteria as much as 60.4%, the attitude of respondents with good criteria as much as 54.2%, and the actions of respondents with good criteria as much as 46.9%.

From the results of our analysis, the level of knowledge, attitudes and actions of respondents regarding handling domestic waste in Pandean Village is good. Furthermore, I suggested that respondents in particular and the Pandean Village community in general be able to improve their knowledge, attitudes and actions in handling domestic waste.

Keywords: *behavior, housewives, domestic waste*
